Dear Mr. Snow:

I am writing you to urge you to reconsider the revised CalFed Plan.

I oppose the CalFed Plan to increase water storage in the Central Valley by raising existing dam levels or building new reservoirs.

Instead I urge you to support a plan to increase conservation and efficient water use, as well as reclamation projects. Time to meter agricultural use! Grow less water-intensive crops!!

I support CalFed's proposed water restoration goals for the Central Valley, especially the removal of dams that will restore habitat for salmon and other anadromous species. It's time for us to stop

785(2)

creating policy that only
addresses the symptoms of
our water crisis instead
of really having some impact
and ^{BRINGING} real reform + change.

If not, what can we
tell our children about
the choices we made when
there was still a chance
to do it right. I would
like to hear your views on

Thank you. This,

Susan Mayer
